Objective

A passionate Data Science graduate skilled in Python, SQL, and data visualization tools. Eager to contribute as a Data Analyst or ML Intern by building impactful data-driven solutions while continuously enhancing my skills in real-world environments.

Skills

Programming: Python, SQL

Databases: Oracle SQL, MySQL

Big Data: Hadoop

Visualization: Tableau, Power BI

Tools & Platforms: Git, Jupyter Notebook, Google Colab

Concepts: EDA, Data Cleaning, Machine Learning (Basics)

Education

B.E. Computer Science and Engineering (Data Science), Annamalai University, 2022-2025

CGPA: 7.71

Diploma in Computer Science and Engineering, Jaya Polytechnic College, 2019-2022

Percentage: 90

Experience

Data Science Intern, The Sparks Foundation (Remote), Jun 2023 - Jul 2023

- * Collected and cleaned datasets by handling missing values.
- * Implemented ML algorithms including regression, decision trees, and clustering.
- * Created visualizations using Python and Tableau.
- * Collaborated with team members to present findings through reports and dashboards.

Projects

Heart Disease Prediction (GitHub: github.com/B-DHANUSH/Machine-learning-projects)

- * Developed a binary classification model using Keras to predict heart disease risk based on 13 features.
- * Used ReLU and Sigmoid activation functions; achieved ~85% accuracy.
- * Technologies: Python, Pandas, Keras, Matplotlib.
